

LEATHER N°10D RADERBELT®

Leather N°10D has the mission of combining robustness and aesthetics. Available from 3 mm in collar and 4 mm in back and crop, this full-grain leather of beef and bull has one of the most important tensile strengths and keeps a coating solidity. After mineral tanning, its immersion in a bath of grease protects it from disturbances in outside environment and from variation in temperatures. It is the ideal partner for outdoor uses.

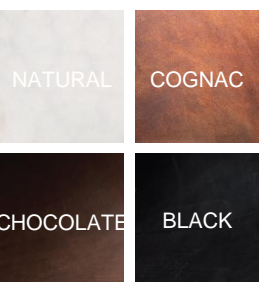

On demand, this leather is stretched to minimise the stretch under load.

Thickness: 3-5 mm

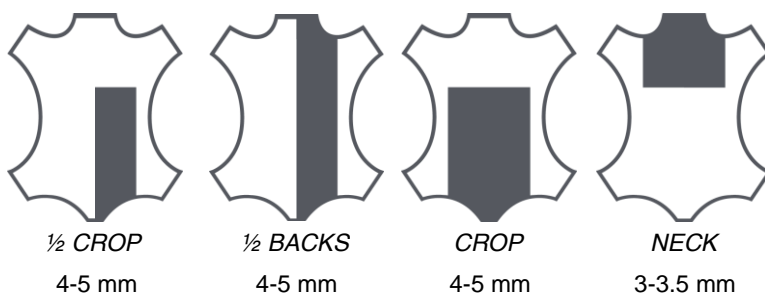

Dyeing: Non-tinted for natural color, tinted in bath for other colors

Coating: Aniline

AVAILABLE COLORS

SKIN AREA

USE EXAMPLE

- Seal
- Molded leather
- Reinforcement parts

ON REQUEST

- Shaving to refine the thickness of the leathers
- Customized coating and color
- Stretching on request possible
