

LEATHER N°30 RADERBELT®

Leather N°30 is a full grain vegetable tanned, result of a selection of the best parts of the skin of beef and bull. The work of the leather N°30 focus on its resilience, which means its bursting strength. Combined with a heddle finish and patina, this leather has a great fastness to rubbing and a wear resistance. Very open, it will react perfectly to maintenance foods. Leather N°30 offers both a heddle and apparent flesh. This leather is used for its friction and bending properties.

The stretched N°30 leather is reworked in wet and stretched on a frame. Under the effect of tension, it decreases its elasticity, its elongation and increases the absorption of direct forces without altering its tensile strength.

Thickness: 4-4,5 mm
Dyeing: Non-tinted
Coating: Natural

AVAILABLE COLOR

SKIN AREA

USE EXAMPLE

- Belt
- Friction belt (with leather n°0)
- Pickers

ON REQUEST

- Shaving to refine the thickness of the leathers
- Customized coating and color
